

# How RVUpgrades.com uses Product Q&A to:

Reach a Conversion Rate of

**75%**

Increase Lifetime Value by

**2x**

Reduce Support Cost by

**60%**

**RV**upgrades.com

## COMPANY BACKGROUND

---

RVupgrades is one of the largest online retailers of RV parts and accessories, providing everything an RV'er needs to outfit their motorhome or camper. RVupgrades' online store ([www.rvupgrades.com](http://www.rvupgrades.com)) has over 10,000 products available and has shipped over a quarter of a million orders.

## THE GOAL

---

Increase sales by growing organic search visibility, organic traffic, conversion rates, efficient customer service, and thought leadership (be seen as “THE resource” for product answers).

## THE PROBLEM

---

**“ The problem was slow cumbersome emails. After answering a customer we had no database or way of efficiently retrieving the information if the question came up again.”**

Before turning to Q&A, RVUpgrades was using email to respond to customer requests.

Bill (RVUpgrades - President) recognized that if they could answer customer product questions quickly and easily in a way that could position them as an online thought leader, they could be recognized by their current customers as a “go to resource” for RV related information, and also positively impact SEO which would attract new customers. They were also hoping for a silver lining in changing how they were managing their customer questions.

This created an opportunity for a win/win/win if they found the right solution that could establish them as an online thought leader, increase their search engine traffic, and make their answer delivery more efficient. These goals led them to Q&A.

## THE SOLUTION

Product Reviews

Q&A

Integration of product Q&A with Product Ratings and Reviews to achieve their online visibility and organic traffic and conversion goals.

When you combine both Social Proof (Product Ratings and Reviews) with Product Q&A on the product pages, you get a multiplier effect that amplifies trust and conversions.

MaxxAir TuffMaxx Coleman RV A/C Replacement Shroud - White

★★★★★ 13 reviews | 37 answered questions

Price: **\$231.56**

MFG: Maxxair

Availability: In Stock

## THE RESULTS

**75%**

actual conversion rate of clients who receive an answer to their question in Q&A

**2x**

in Customer Lifetime Value by adding Q&A to their product pages

**60%**

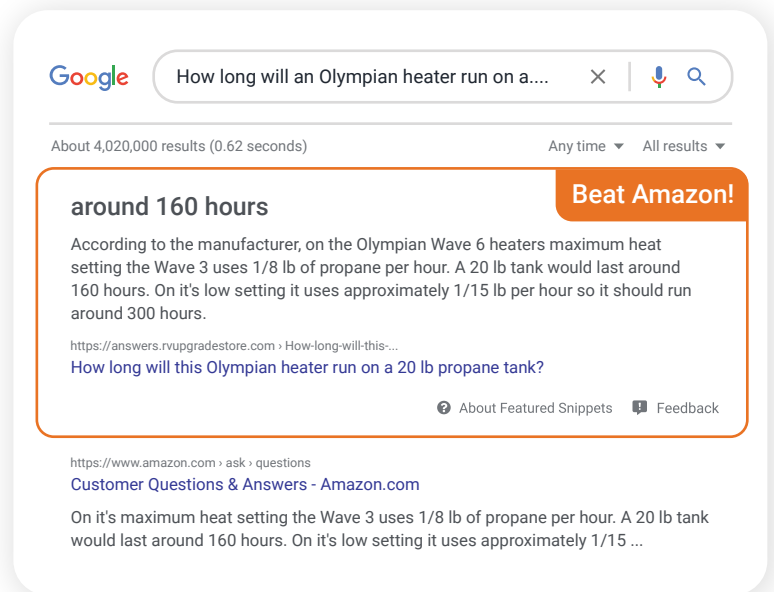

reduction in customer support and supports costs by adding Q&A.

## THE EVIDENCE

Q&A fuels Google Organic Featured Snippets at the top of search results, which drives more high purchase intent organic traffic and conversions.

Imagine **1000s** of long-tail, high purchase-intent organic search results in **Position 0...**
